

1 Scope

Informative Guidance Note on Incorporation of Other Marine Energy Systems into the Floating Sub-Structure: In the event other ocean energy systems are included in the Floating Sub-Structure, including but not limited to wave energy converters and ocean flow energy converters, the analysis of the sub-structure shall take into account the effects of the devices on the response of the platform. The unique aspects of Marine Hydro Kinetic devices are addressed in the IEC TC 114 suite of documents. Safety requirements for the combined systems shall be the same as for stand-alone floating wind systems.
